Mr. Harold Weisberg, Hyattetewn, Maryland. 20734

Dear Mr. Weisberg: Thought you might be interested in this letter to Mr. Ramsey Clark.

Isn't this positive proof that one man could not have get off the
three shots, from a belt stion rifle, in that space of time?

Remember, tee, that Oswald was LEFT-HANDED.

Hemerable Rammey Clark, The White House, Washington,

G. NORMAN ALBREE 7 Stratford Road Winchester, Massachusetts

21 March 1967.

Dear Mr. Clark:

** -4.8 - 5.6 Seconds' ** -4.6 -4.6 Seconds 0.2 1.0 Seconds

- The Sarren Report states that this is the "Time Span of the Shets" three.
- time required to operate that the minimum time required to operate the helt of the Unreame rifle is "2.7 Seconds" - for three shots the helt must be operated twice and, homes, 4.6 seconds are required.
- to emetly 1.0 second for the riflemen to 'get back on target' twice which, manifest-ly, is a physical impossibility.

It is respectfully requested that this letter tegether with that of 11 March 1967 or copies thereof - be placed with my other desuments pertaining to the assassination of President Kennedy in the Matiemal Archives.

G. M. albrig
